

Thermal Protection for Critical Electronics

DTS 3000, DTT 6000 and DTI 6000 Series Cooling Units

Utilize closed loop cooling in tough industrial or outdoor applications with Pfannenberg's 'service-friendly' cooling units.

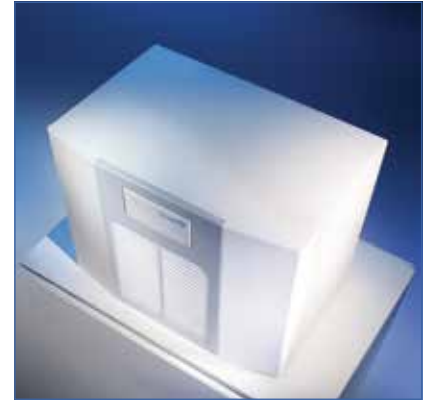

Our DTS 3000 Series is driven to meet the demands of our North American NEMA market. These units meet the needs on indoor NEMA Type 12 applications, NEMA 3R/4 outdoor applications and NEMA Type 4/4x stainless steel for washdown applications.

An absolute world innovation: the DTT Series. The 6000 Series top mounted cooling units offer unique security through the innovative, patented condensate management system and it is installable in the most limited of spaces.

The DTI 6000 Series allows for European-style recessed mounting on enclosure doors and/or side panels on modular systems. These "click & fit" units reduce installation times by half.

DTT Top Mounted Cooling Units

Featuring a unique, patented condensate management system which prevents all condensate from penetrating into the electrical enclosure. The very small installation size also means that you can install your electrical enclosures in a row to save space.

Further advantages of the DTT Series:

- **Excellent security level** due to patented condensate management system
- **Perfect service-friendliness** and long maintenance intervals
- **Product variety:** 3 installation sizes with 6 performance levels available
- **Modern design** and large selection of surface finishes and colors
- **Environmental protection** thanks to energy efficiency and recyclability
- **Easy mounting:** quick release mounting frame

The proven industry standard: DTI/DTS Cooling Units for partially-recessed and side mounted installation

Innovative Technology

- Condenser with 3 mm fin spacing, highly effective protection against strongly contaminated ambient air
- Large distance between intake and exhaust vents, safe circulation within the electrical enclosure due to long passage of air, therefore hot spots are eliminated
- Standard controller allows for quick set up and error reporting to customer

Ease of Service and Mounting

- Integrated Cooling System®: DTI 6x01, mounted by 1 man in 2 minutes
- Easy access to fans and electronics for quick changes in the field

High Variability

- Integrated condensate evaporation system
- Coated condensers and pipes standard for all outdoor and washdown NEMA units
- High pressure switches to protect compressors are standard on ALL Pfannenberg Cooling Units
- Integrated Cooling System®: one mounting cut-out for 5 different performances

Conforms to International Standards

- Global approval such as CE, UL, cUL, some GOST for Russia and CSA for Canada
- DTS Cooling Units up to protection class NEMA 4/4X

Indoor NEMA Type 12 Side Mount Cooling Units

Features/Benefits:

Pfannenberger strives to provide a relatively maintenance-free design for our customers. All our designs have additional options including:

Filter Kits Option- for special applications like wood and machine tool that need an external filter to prevent clogging of the condenser core.

Corrosion Resistant Option - for special applications which require a coated condenser and copper piping, such as PVC pipe manufacturing or other indoor corrosive applications.

Voltage Options - Many of our cooling units have been designed for both 50/60 Hz applications as well as 400 or 460 V operations with a simple jumper change in the e-box.

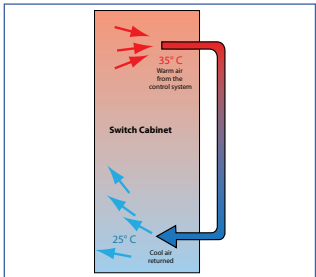

Wide Condenser Fin Spacing

This filter-free design also reduces the amount of maintenance required by the customer. A quick cleaning of the condenser is required less frequently versus the competition's models, while capacity is not compromised by easy clogging of the condenser core.

Rugged, Long-lasting Backward Curved Impeller Fans

Utilizing this type of fan, our cooling units can go twice as long before needing service versus a typical blower style fan that has smaller, low-cost and high maintenance bearings.

Proper Long Internal Air Flow Paths

The backward curve fan also has a natural right angle air path that allows our cooling units to capture hot air from the top of the electrical cabinet and deposit cool, dry air to the bottom of the cabinet and underneath critical components on the panel.

Hermetically Sealed Refrigeration Circuit

Utilizing a maintenance free design, Pfannenberger implements a hermetically sealed design that **eliminates gasketed valves** and the leak source for many other A/C unit designs. Therefore, our cooling units do not need annual maintenance to determine if the unit is properly charged with R134a refrigerant.

Standard Control Board

Controlling temperature and alarm setting via dip-switches, preventing airflow short cycling, high pressure switch alarm, on/off control of compressor with built-in delay timer and a LED lamp with four different flashing sequences. The control board is located in inner air circuit for protection from heat and dirt.

Application Examples

The following are just a few examples of the industries and applications in which Pfannenberg's Top Mount and Indoor Cooling Units can be utilized. Call us today to find out how you can cut costs by keeping your processes, whatever they may be, up and running with reliability you can count on.

Conveyors / Material Handling

Textile / Paper / Glass Machinery

Automation / Assembly

DTS 1200

Cooling Unit 900 - 1200 Btu/h

- Maintains a NEMA 12 seal against enclosure
- Recognized to UL 484, category ACVS2/8, UL File #SA10300
- CE approved for European use
- Compact side mount design for small enclosures or hot spot cooling for larger enclosures
- Powder coated steel cover for rugged environments, easily painted to match enclosure
- Uses a mechanical thermostat control

DTS 3141 (NEMA Type 12)

Cooling unit 3000 - 4000 Btu/h

- Long internal air path captures heat above components and provides cool air below
- Maintains a UL Tested NEMA Type 12 seal against enclosure
- UL 484 Listed, category ACVS, UL file #SA10300, CE approved for European use
- Standard Controller (SC) with active alarm and door contact input
- Powder coated steel cover for rugged environments, easily painted to match enclosure or machine
- Condenser with 3 mm fin spacing, highly effective protection against strongly contaminated and aggressive ambient air
- Utilizes a thermal expansion valve (TXV) to ensure maximum performance over a broad range

Data		DTS 3141 (NEMA Type 12)			Unit
Part number	ANSI 61 (Gray)	13385436251	13385441251	13385444251

DTT 6101**ECOOL** Cooling Unit 1200 - 2000 Btu/h**DTT 6201****ECOOL** Cooling Unit 2500 - 4000 Btu/h**DTT: for top mount or roof mount installation**

- Product variety: 3 installation sizes and 6 performances
- 4-fold protection against condensate with patented condensate management system
- Tool less mounting and maintenance due to quick-release mounting frame
- Service-friendly: complete cover removable towards the front.
Easily accessible filter mats and control elements in front area.
- Energy efficiency: around 20 % saving on energy thanks to the use of more effective, lighter components
- Energy efficiency: optional multi-controller with energy-saving operation mode
- UL certification
- Design and color matching: perfect mixture of functionality and design

Data		DTT 6201			DTT 6101		Unit
Part numberRAL 7035 (Light Gray)		13216249055	13216241055	13216244055	13216141055	13216144055	
Rated voltage ± 10 %		400 / 460 1Ø	230	115	230	115	VAC
Frequency		50 / 60					Hz
Cooling performance according to EN 14511		2500 - 4000			1200 - 2000		Btu/h
Power consumption		706 / 845	663 / 805	877	458 / 532	569	W
Nominal (Run) Current		1.5 / 1.8	3.39 / 3.83	8.05	2.2 / 2.4	5.2	A
Starting current		8.5 / 9.3	14.8 / 17.4 (60 Hz)		23.0		
Unimpeded airflow (free flow)	internal	335 / 343 (570 / 582)					CFM (m³/h)
	external	1071 / 1159 (1820 / 1970)					
Fuse (maximum)		6	10	20	10	20	A
Type of connection		spring-type terminal included with plug					
Noise level (according to EN ISO 3741)		< 62					dB(A)
Weight (without packaging)		90 (41)	77 (35)		73 (33)		lb (kg)
Ambient temperature range		+ 59 ... + 131 / + 15 ... + 55					°F / °C
Control range (adjustable)SC		+ 77 ... + 113 / + 25 ... + 45; factory setting + 95 / + 35					
Refrigerant	type	R134a					
	quantity	400					g
Duty cycle		100%					
Condensate management		active condensate evaporation system with safety overflow					
Protection system according to EN 60529		NEMA 12 against enclosure when properly installed					
		NEMA 1 towards the surroundings when properly installed					
Design	housing	galvanized sheet steel					
	cover	galvanized/electrostatically powder coated (200 °C)					

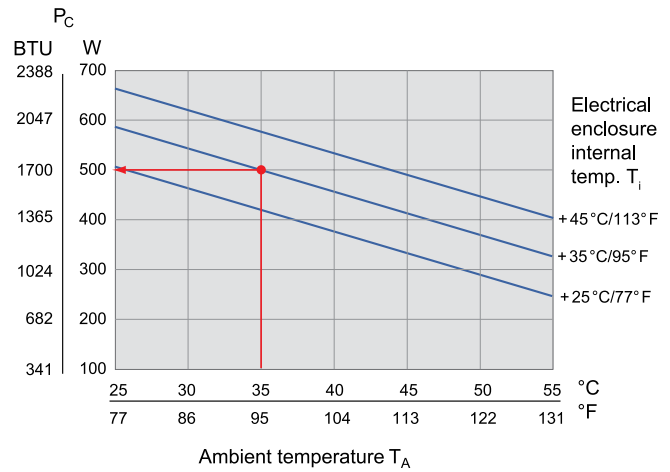

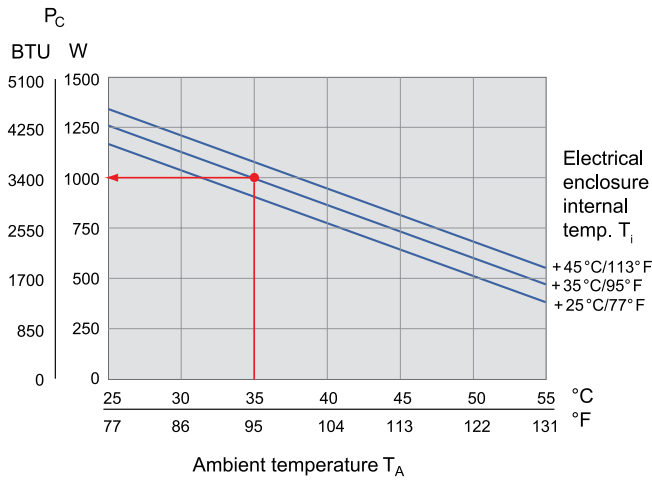

Accessories	Piece	Part number	Information on page
Fluted Filter	1	18311500000	104
Condensate bottle	1	18314000100	104

Approvals see page 15/16

Cooling Capacity Performance Curve
